Hack of the Day #360: Volumized curls

Do your curls lack volume? What products are you using to achieve volumized curls?

In order to achieve volumized curls, I recommend the 'PUFF me' @designmehair dust pump because it gives volume and lasts all day.

After you have curled your hair, starting from the nape area, start teasing lightly, apply the pump dust on the roots and work your way up. This is a very easy process and can easily be done within 5 minutes. It can be parted in large sections if you want less volume. The beauty of this tip is that you can work around it and you can tease any section where you think lacks volume. #hairhacksandi
